DATA ANALYTICS | SQL | PYTHON | ADVANCED EXCEL

PROFESSIONAL SUMMARY

B.Sc. Computer Science student graduating in 2027 with a strong foundation in data analytics, SQL, Python, Advanced Excel, data cleaning, data validation, visualization, and analytical problem-solving. Experienced through academic projects in translating business requirements into structured technical solutions and working with data-driven workflows. Interested in applying statistical reasoning, exploratory analysis, and programming to solve complex business and risk-related problems. Strong interest in building reliable, scalable, and data-driven solutions.

EDUCATION

SIES College of Arts, Science and Commerce, Mumbai

B.Sc. Computer Science | Expected Graduation: 2027

Relevant areas: Computer Science, Data Analytics, Database Concepts, Programming, Statistics, Data Management

TECHNICAL SKILLS

Programming & Data: Python, SQL, Pandas, Data Cleaning, Data Validation, Exploratory Data Analysis

Analytics & Visualization: Advanced Excel, Power BI, Data Visualization, Reporting, Dashboarding

Statistics & Analytics: Descriptive Statistics, Analytical Reasoning, Data Interpretation, Basic Statistical Analysis

Databases: SQL, Relational Database Concepts, Data Querying

Development: Git, Python Application Development, Object-Oriented Programming

Other: Documentation, Quality Checks, Problem Solving, Analytical Communication

PROJECTS

CommuteSync – Carpooling & Commute Management System

Academic Project | Python | SQL/Database Concepts

- Designed a structured carpooling and commute-management system to organize users, rides, bookings, and related operational data.
- Applied database and programming concepts to structure, manage, and validate application data.
- Developed application functionality using Python and organized the system into reusable functions and components.
- Worked on data and workflow requirements across different system activities, supporting reliable information flow between application components.
- Documented system functions, activities, classes, and database tables to improve clarity and maintainability.
- Applied analytical problem-solving to translate a real-world transportation problem into a structured technology solution.

Data Analysis & Business Intelligence Projects

Academic / Self-Directed

- Practiced data cleaning, transformation, validation, exploratory analysis, and insight generation using structured datasets.
- Used SQL concepts to query and analyze datasets and identify patterns relevant to business questions.
- Used Advanced Excel for data analysis, calculations, reporting, and structured presentation of findings.
- Applied data visualization and dashboarding concepts to communicate analytical findings clearly.

CERTIFICATION

Advanced Excel Certification

- Advanced spreadsheet functions and analytical techniques
- Data analysis and reporting
- Data organization and visualization

CORE COMPETENCIES

- Data Analysis & Exploratory Analysis
- Data Cleaning & Validation
- SQL Querying
- Python-Based Data Analysis
- Statistical Reasoning
- Feature/Data Preparation
- Business Problem Solving
- Data Quality & Accuracy
- Analytical Documentation
- Data Visualization
- Dashboarding & Reporting
- Structured Problem Solving

ADDITIONAL INFORMATION

- Strong interest in Data Science, Risk Analytics, Decision Science, and Data-Driven Product Development
- Interested in applying analytical methods to financial services, credit risk, fraud, and decision-support problems
- Based in Mumbai and available for on-site opportunities and remote opportunities
